As an unregistered user, when I **complete the registration form** I expect/want **to be told that I have successfully registered and be directed to a welcome screen.**

As a **registered user,** when I **login** I will be redirected my dashboard which displays my projects.

As a **registered user**, from my dashboard page, I should have the ability to create a project, edit a project, save a project, close a project, and download/print a project.

- user will be able to insert project name
- user will be able to insert customer name
- user will be able to insert contact name, email and phone number
- from edit screen, user will be able to add tasks, billable hours and Google calendar integration

As a **registered user**, in the **create/ edit project** page, I should have the ability to create tasks. For each task, I should be able to add a title of the task, description of the task, start/ end dates of the task, and billable hours.
